

## Séminaire de l'axe 4

**19 NOVEMBRE 2020 - 15H00 - EN LIGNE**

**LIEN : [HTTPS://BBB-3.UNIV-LILLE.FR/B/MUS-KRG-NNF](https://bbb-3.univ-lille.fr/b/mus-krG-NNF)**

**Introduction** 15h00 - 15h15

Widad Mustafa El Hadi, GERiICO

**Plagiarism is copyright infringement, open science is not: a new opportunity for libraries to clarify the question**

**Le plagiat est une violation du droit d'auteur, la science ouverte ne l'est pas : c'est avant tout une nouvelle opportunité pour les bibliothèques de clarifier la question**

Daniel Martínez Ávila, Université Carlos III 15h15 - 16h00

Plagiarism is a serious misconduct and one of the worst intellectual offenses that can be found in academia. Plagiarism is usurping knowledge and cerebral creations of others. Broadly speaking, plagiarism is a copyright infringement. On the other hand, open science advocates for making research publications and data freely available. In many cases, open science implies reproducing, altering or distributing the work of others without permission. There are many legal uncertainties and questions related to the use of intellectual works in the open science scenario and that is also an opportunity for libraries. In this sense, many libraries around the world have created copyright offices that, among other responsibilities, provide information assistance in relation to these questions. This presentation will review and discuss the concept of plagiarism and the legal options that can be used to avoid it, the concept of open science, as it was presented at the Association of European Research Libraries (LIBER) by the Ministère de l'Enseignement supérieur, de la Recherche et de l'Innovation, and the experience of some of the copyright offices in top universities around the world in this regard.

**DISCUSSION** 16h00 - 17h00

### **COURTE BIOGRAPHIE**

Daniel Martínez Ávila received his PhD degree in Documentation from Universidad Carlos III de Madrid in 2012. He worked as a researcher and adjunct instructor at the School of Information Studies at the University of Wisconsin-Milwaukee, United States, in 2013-2014. In 2013 he also taught at Bryant & Stratton College Milwaukee in the United States. In 2014 he started to work at the Department of Information Science of São Paulo State University (UNESP), in Brazil.
